Attention: Alan Wells

Dear Alan,

## Effects of Modifications to Rail Loop Design for Moolarben Stage 2 Project's Air Quality Effects

Thank you for your email sent earlier today and the accompanying plan show a proposed change to the rail loop design for the Moolarben Stage 2 project. For the record I have attached a copy of the plan showing the original and modified rail loop design to this letter.

I have reviewed the changes and confirm that they would not affect the air quality impacts effects of the project as assessed in our recent report dated 5 March 2009.

Yours faithfully, Holmes Air Sciences

Nigel Holmes PhD Atmospheric Physicist
